

A PRELIMINARY EVALUATION ON THE EFFECTS OF KIDSGYM USA ON THE DEVELOPMENTAL MILESTONES & GROSS MOTOR SKILLS OF PRESCHOOL STUDENTS

Evaluation Question:

When implemented, what effect does the KiDsGyM USA curriculum have on developmental milestones and gross motor skill development in a group of preschool children?

Participants:

Participants were students (n=18) taking part in the KiDsGyM USA program as part of their academic day at a Southeast Atlanta preschool.

Procedure: Students were administered a nationally standardized pre and post developmental assessment. Gross motor skills were examined and rated through direct observation pre and post program. Data collection occurred over a 6-month period.

RESULTS

**Significant change
in adaptive
behavior skills**

**Significant change
in communication
skills**

**Significant change
in gross motor
development**
